Practical – X

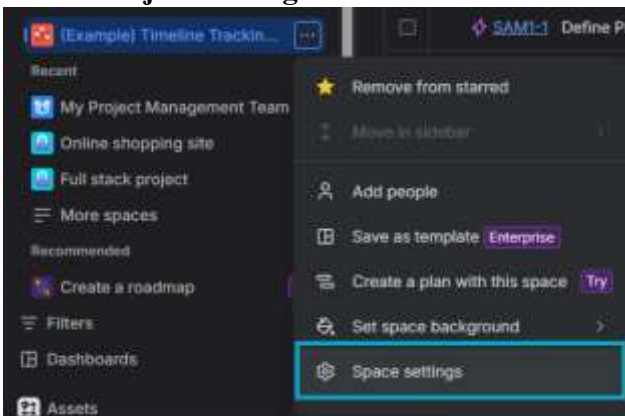

Roll No :- T053	Name :- Nidhi Yadav
Class :- TYIT	Batch :- 02
Date of Assignment :- 26-09-2026	Date/Time of Submission :- 26-09-2026

Aim:

To view and modify the project permission scheme in Jira.& To configure project roles and assign permissions to users in Jira

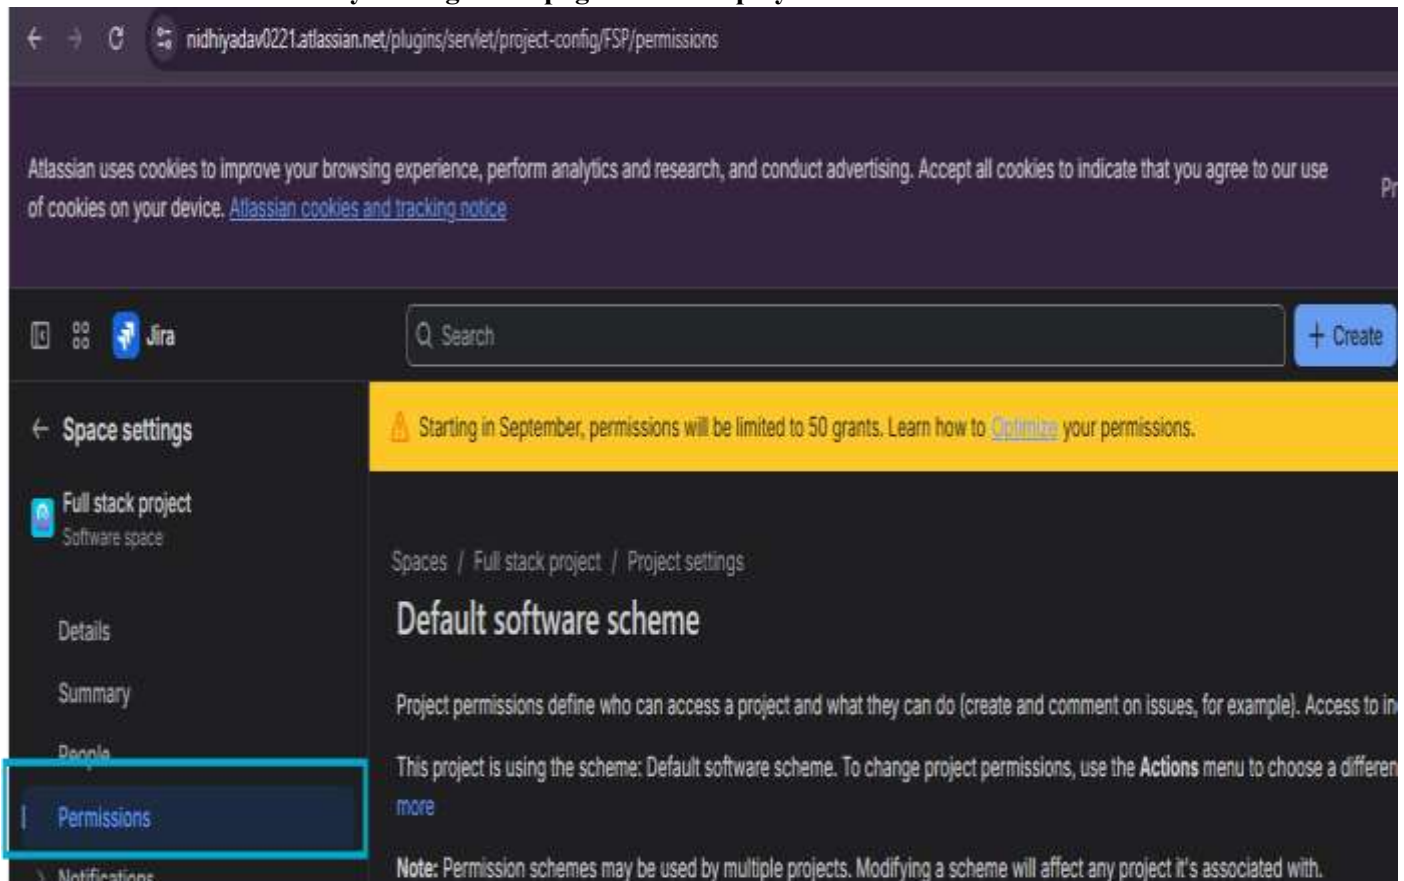

Open your Jira project.

Go to Project Settings.

Click on Permissions.

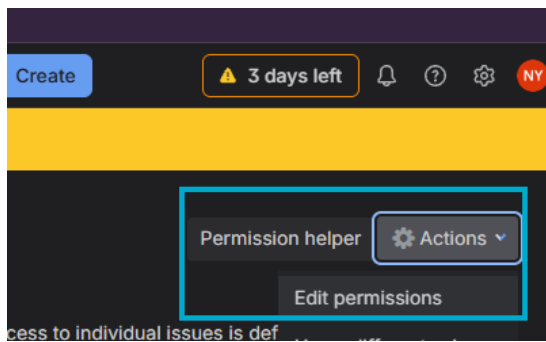

The Permission and Security Management page will be displayed.

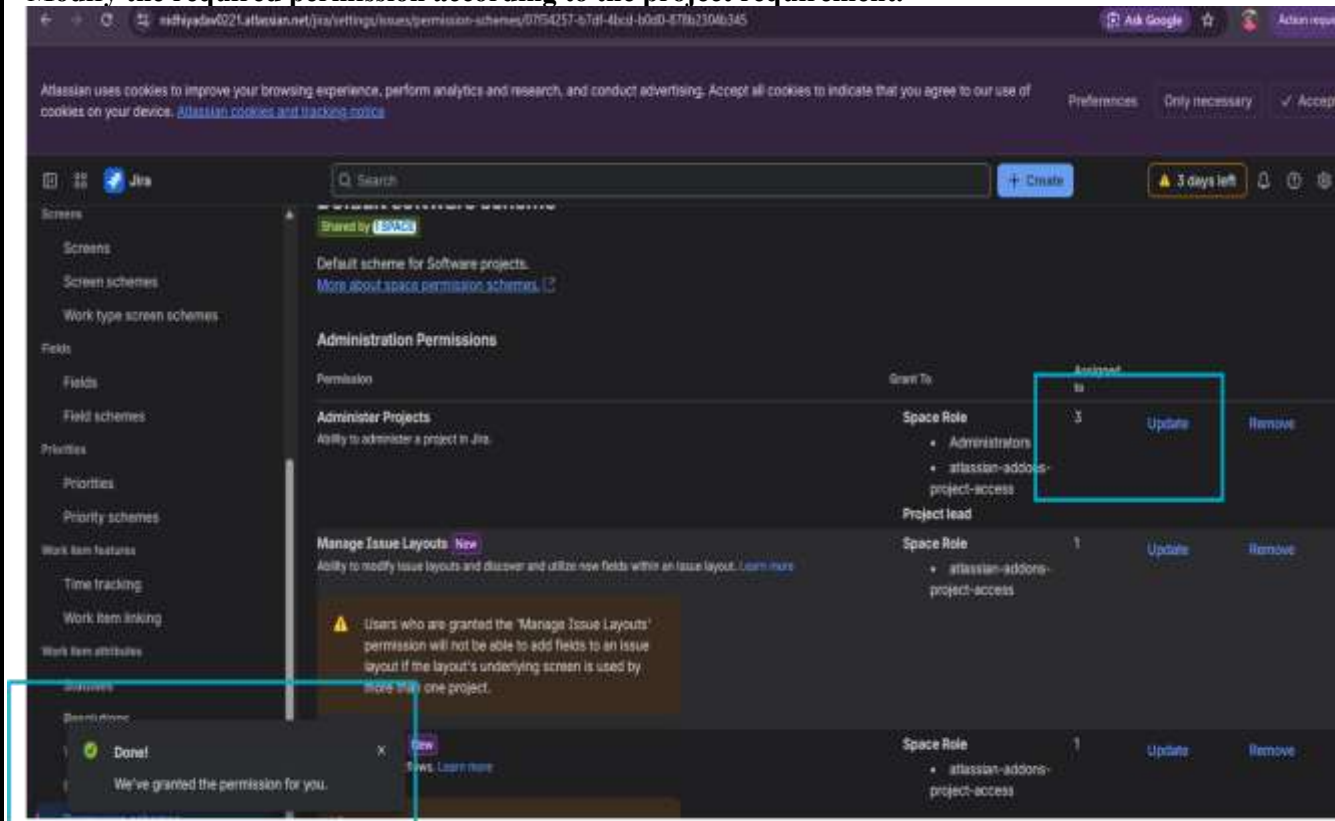

View the existing permission scheme and the permissions assigned to different roles/users.

To modify permissions, click on Actions.

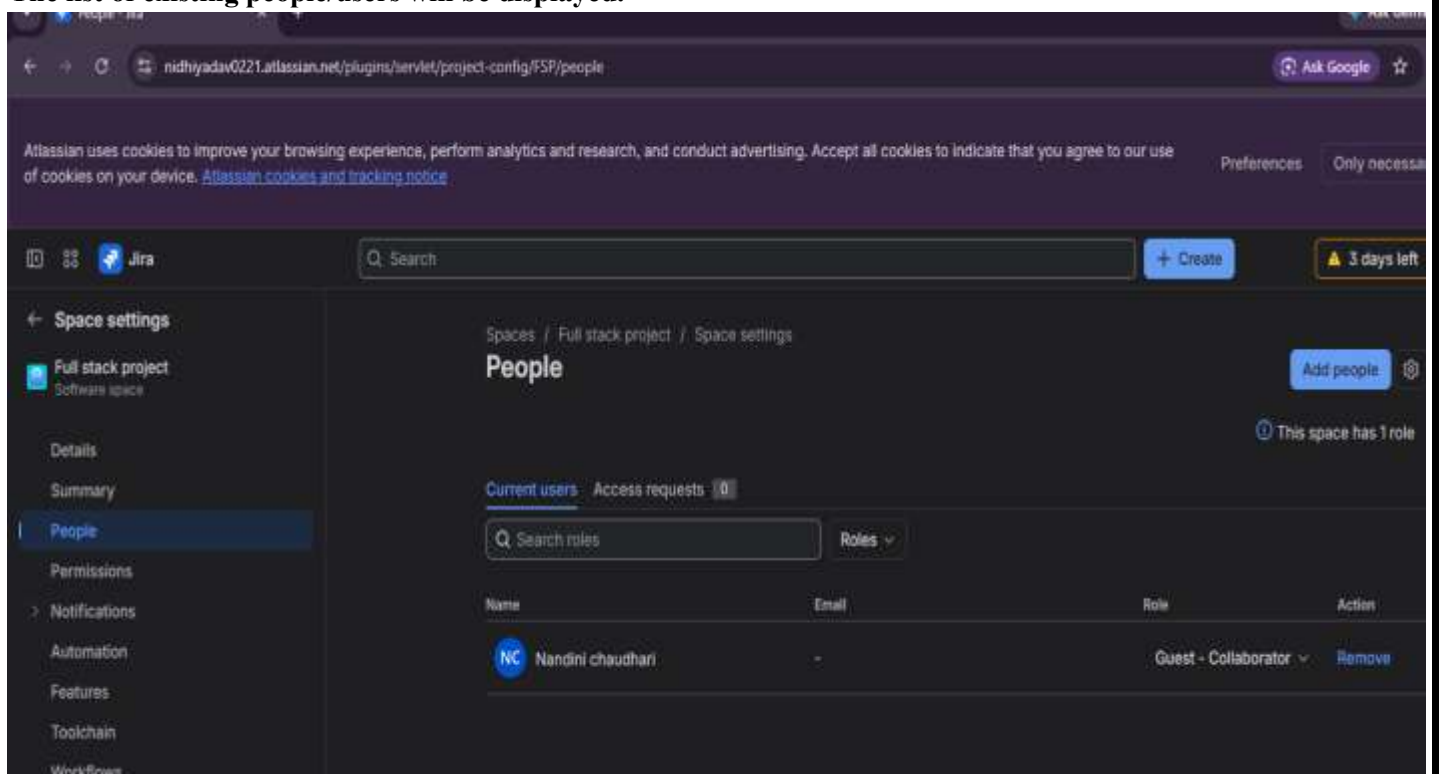

Select Edit permissions.

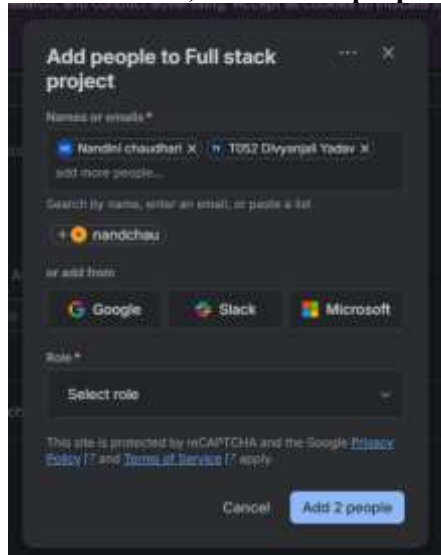

Modify the required permission according to the project requirement.

Click on People.
The list of existing people/users will be displayed.

add new users, click Add 2 people.

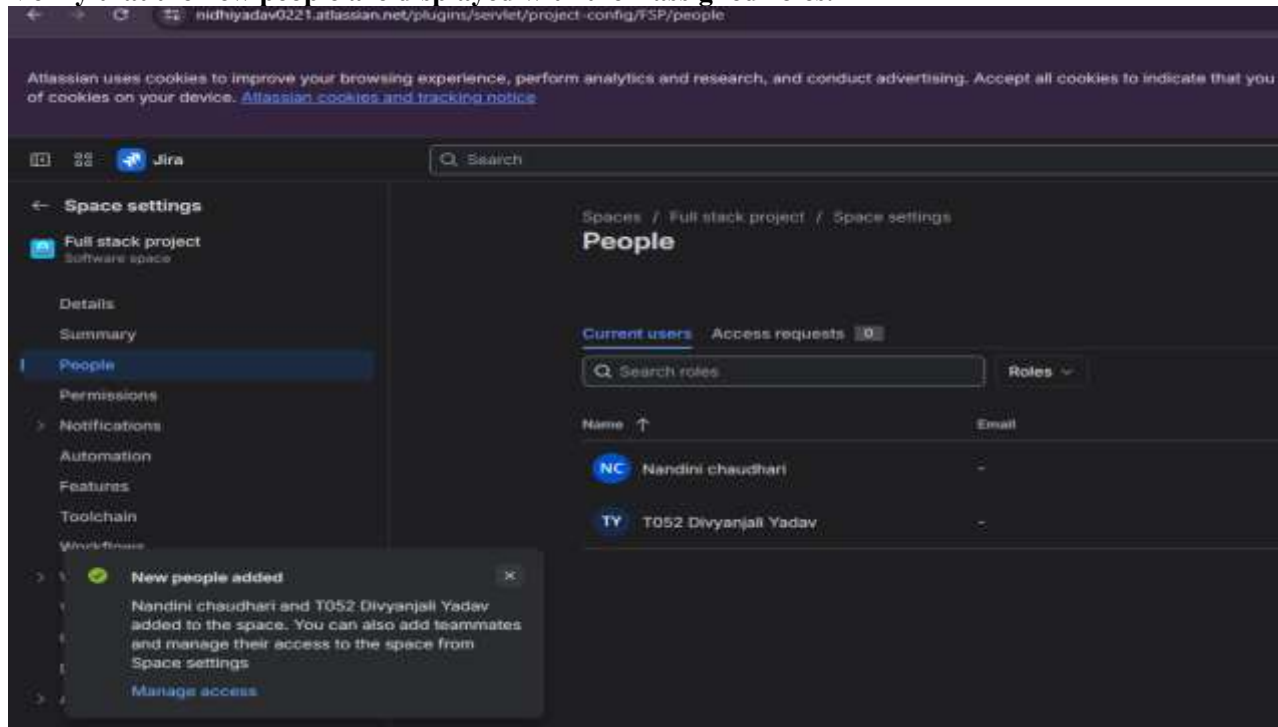

Enter/select the required users.

Assign the appropriate project role to the users.

Click Add / save the changes.

Verify that the new people are displayed with their assigned roles.

Classification

This practical can be classified under:

Category: Permission and Security Management

Type: Role-Based Access Control

Area: Jira User/Project Administration

Function: Adding users and assigning project roles

Justification

Project roles determine what level of access or responsibility a user has within a Jira project. In this practical, users are managed through People, new users can be added using Add 2 people, and appropriate project roles are assigned to them. Therefore, this practical is classified as role-based access control and project user management.
