Artificial Intelligence Practical – II

Name :- Nidhi Yadav	Roll No:- T053
Class :- TYIT	Batch :- 02
Date of Assignment :- 019/09/2026	Date of Submission :- 01/09/2026

Practical 2A – Add Team Members

Steps:-

1. **Open the required AI/project platform.**
First, open the project or workspace where you want to create a team.
2. **Go to the Team/Project section.**
Select the option related to Team Members or Members.
3. **Click on “Add Team Members”.**
This option is used to add students or other members to the project team.
4. **Enter the member details.**
Enter the required information such as the member's name, email ID, or other details.
5. **Add all required members.**
Repeat the same process for each student who needs to be included in the team.
6. **Save the changes.**
After adding all members, click Save/Add/Done to confirm the team.

Explanation:-

Adding team members allows multiple people to work together on the same project. Each member can be added to the project so that they can participate in different project activities according to their assigned responsibilities.

Practical 2B – Assign Roles

Steps:-

1. **Open the project team.**
Go to the team/project where members have already been added.
2. **Select a team member.**
Choose the member for whom you want to assign a role.
3. **Open the Role option.**
Click on the Assign Role or similar option.
4. **Select the required role.**
Choose an appropriate role according to the member's responsibility.
5. **Assign the role.**
Confirm the selected role for that particular member.
6. **Repeat for other members.**
Assign suitable roles to all team members.
7. **Save the changes.**
Finally, save the role assignments to complete the process.

Explanation:-

Assigning roles helps divide the project work among team members. Each person gets a specific responsibility, which makes teamwork more organized and helps complete the project efficiently.
