Artificial Intelligence Practical – VIII

Roll No :- T053	Name :- Nidhi Yadav
Class :- TYIT	Batch :- 2
Date of Assignment :- 29/08/2026	Date/Time of Submission :- 29/08/2026

Prac 1 A Create a Jira Cloud account and explore the dashboard.

Jira is a project management and work-tracking tool used to organize and monitor project activities. It allows users to create projects, manage tasks, track their progress, and collaborate with team members.

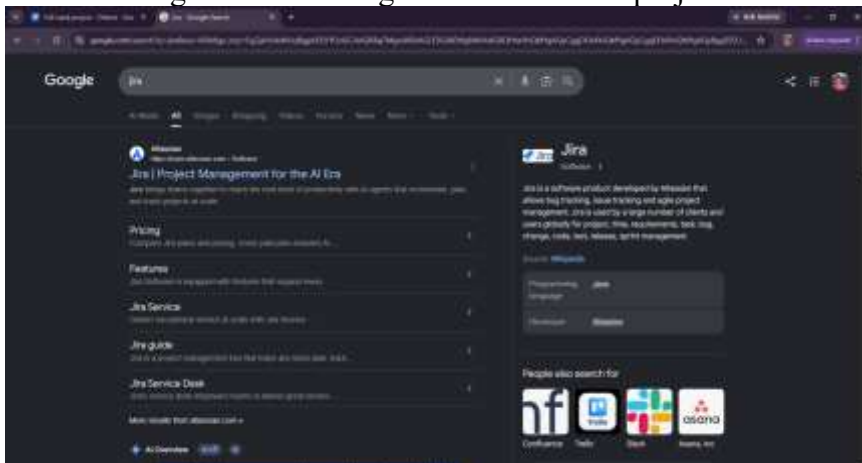

Jira provides different options according to the type of work being performed. During the initial setup, the user selects the type of work, such as project management, so that Jira can provide suitable templates and features.

A project/space in Jira acts as a common workspace where related work is organized. It contains the tasks, boards, team members, and other project-related information.

Jira also provides a Dashboard, which gives users an overview of their work and provides access to their projects and other Jira features.

Step 1: Open Jira

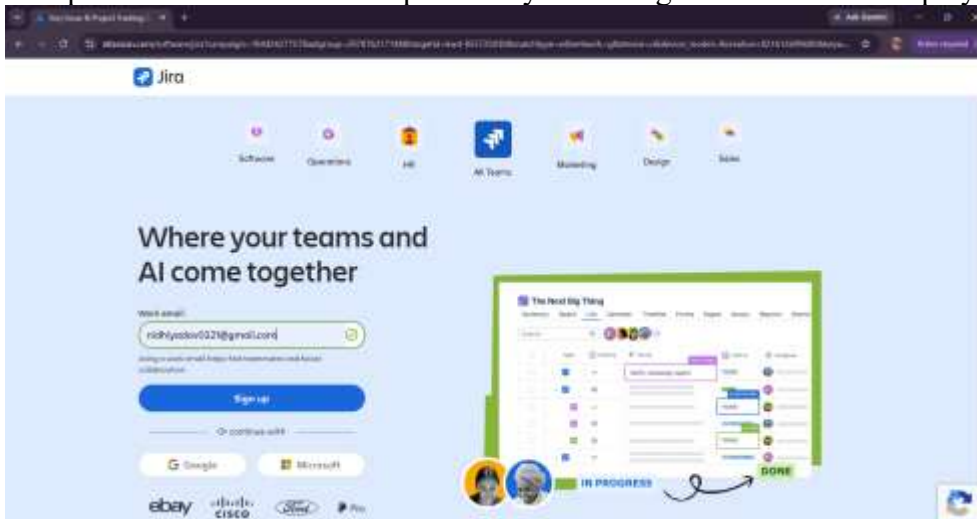

Open Google and search for **Jira**. Open the Jira website to begin the setup. Jira is a project management and work-tracking tool used to organize and monitor project activities.

Step 2: Create a Jira Account

Click on Sign up and enter the required email/account details. Click Continue to create or access your Jira account.

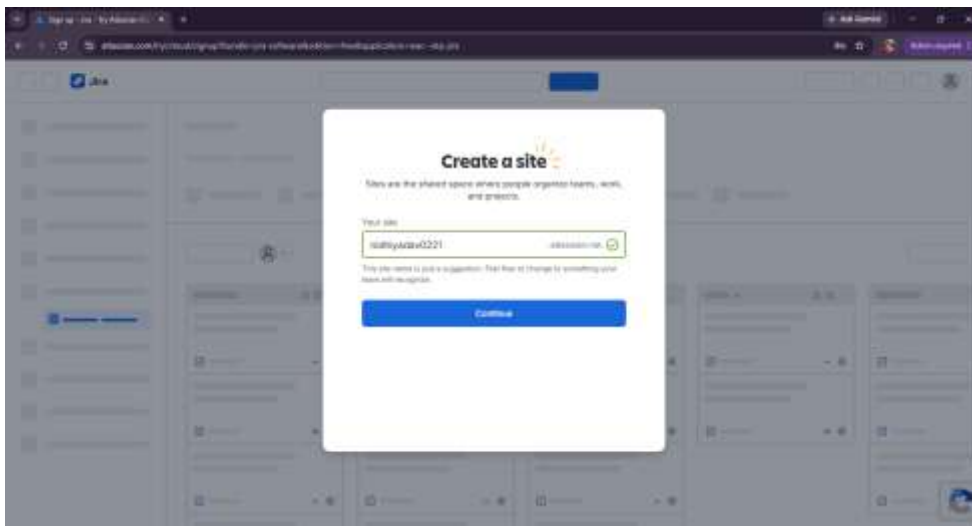

Complete the account creation process by following the instructions displayed on the screen.

Step 3: Create a Site

After creating the account, the **Create a site** screen will appear.

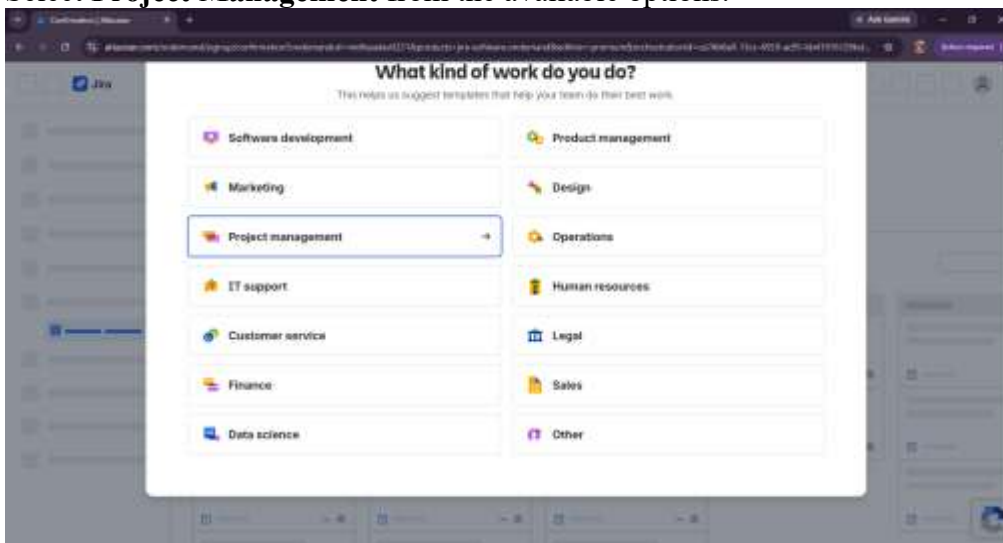

Enter a suitable site name and click **Continue** to proceed with the Jira setup.

Step 4: Select the Type of Work

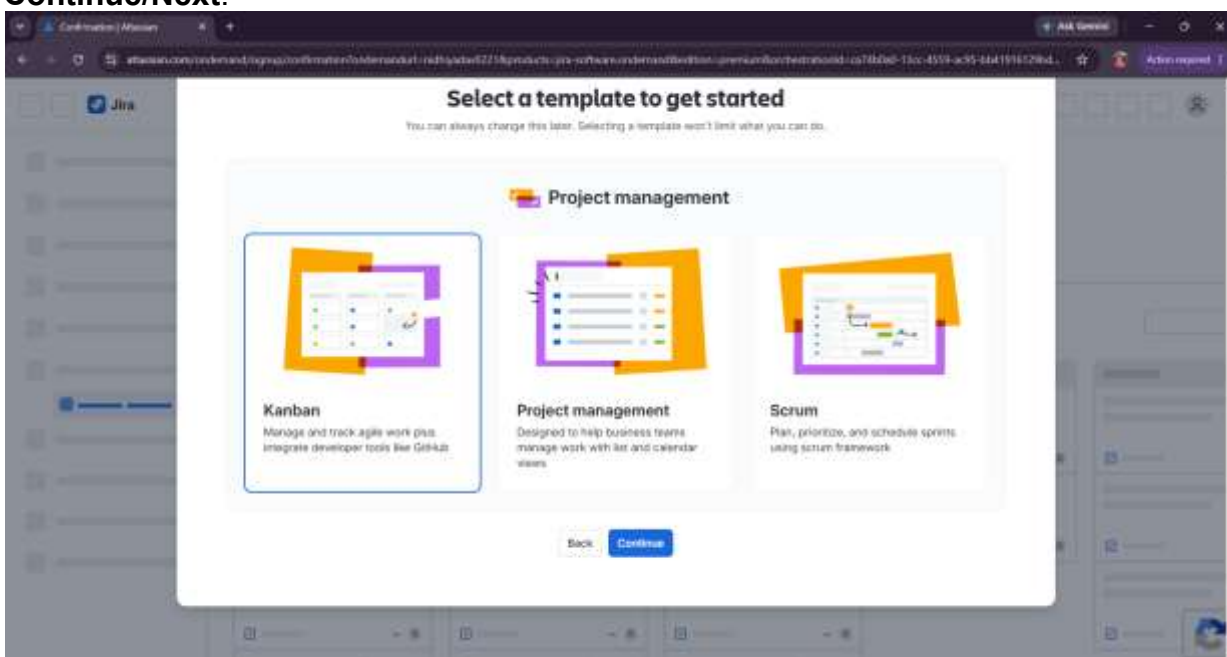

Jira will ask “What kind of work do you do?”

Select **Project Management** from the available options.

Step 5: Select a Template

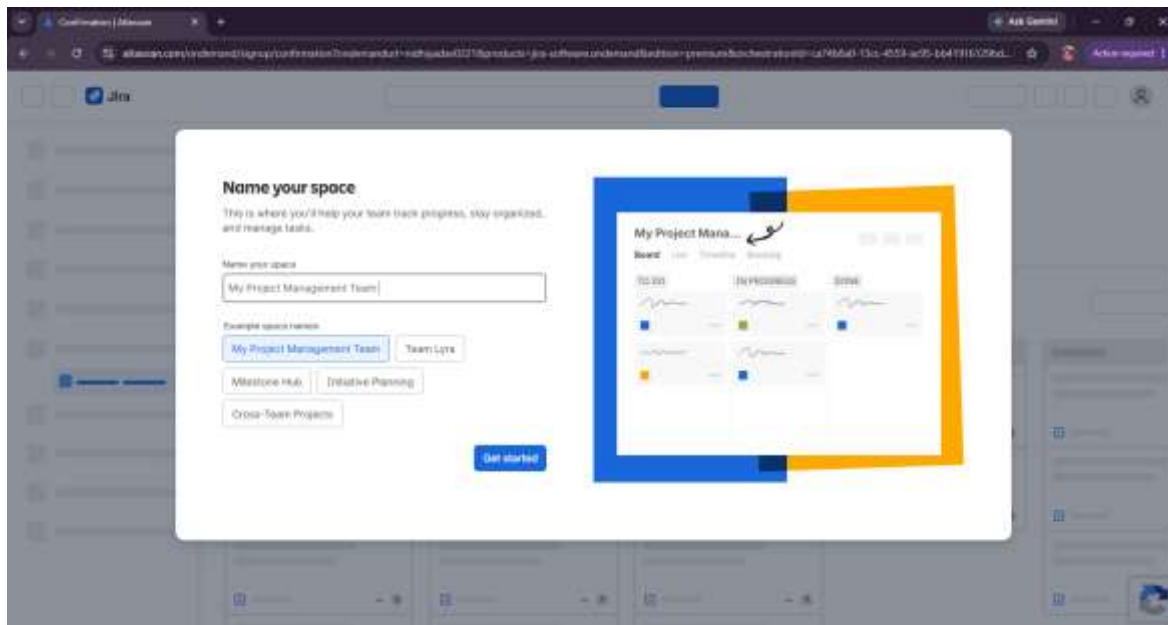

From the available Project Management templates, select the **Kanban** template and click **Continue/Next**.

Step 6: Enter the Space/Project Name

Enter a suitable name for your project/space in the **Name your space** field.

Select the appropriate options and click **Get started** to continue.

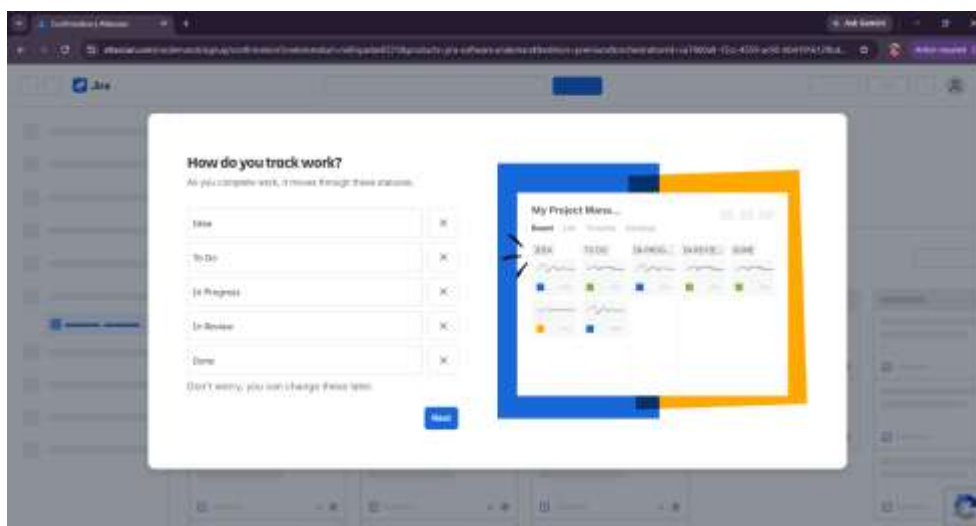

Step 7: Configure Work Tracking

The **How do you track work?** screen will appear.

Configure the required work stages, such as:

To Do → In Progress → In Review → Done

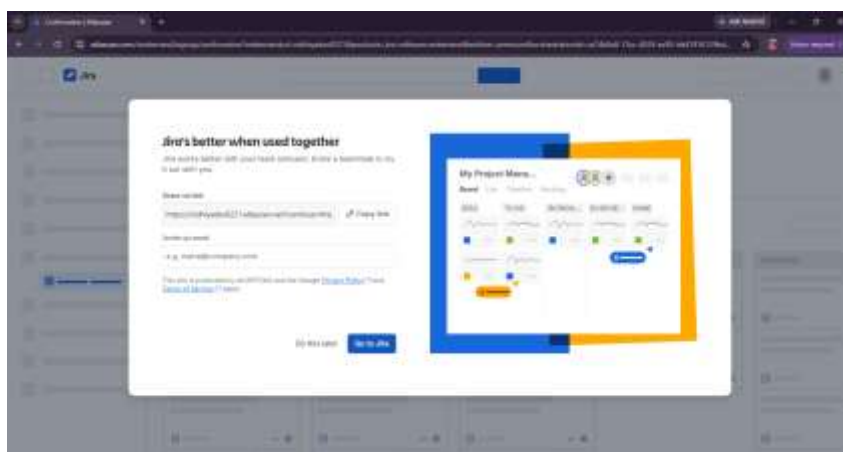

Then click **Next**.

Step 8: Complete the Setup

After completing the setup, click **Go to Jira**.

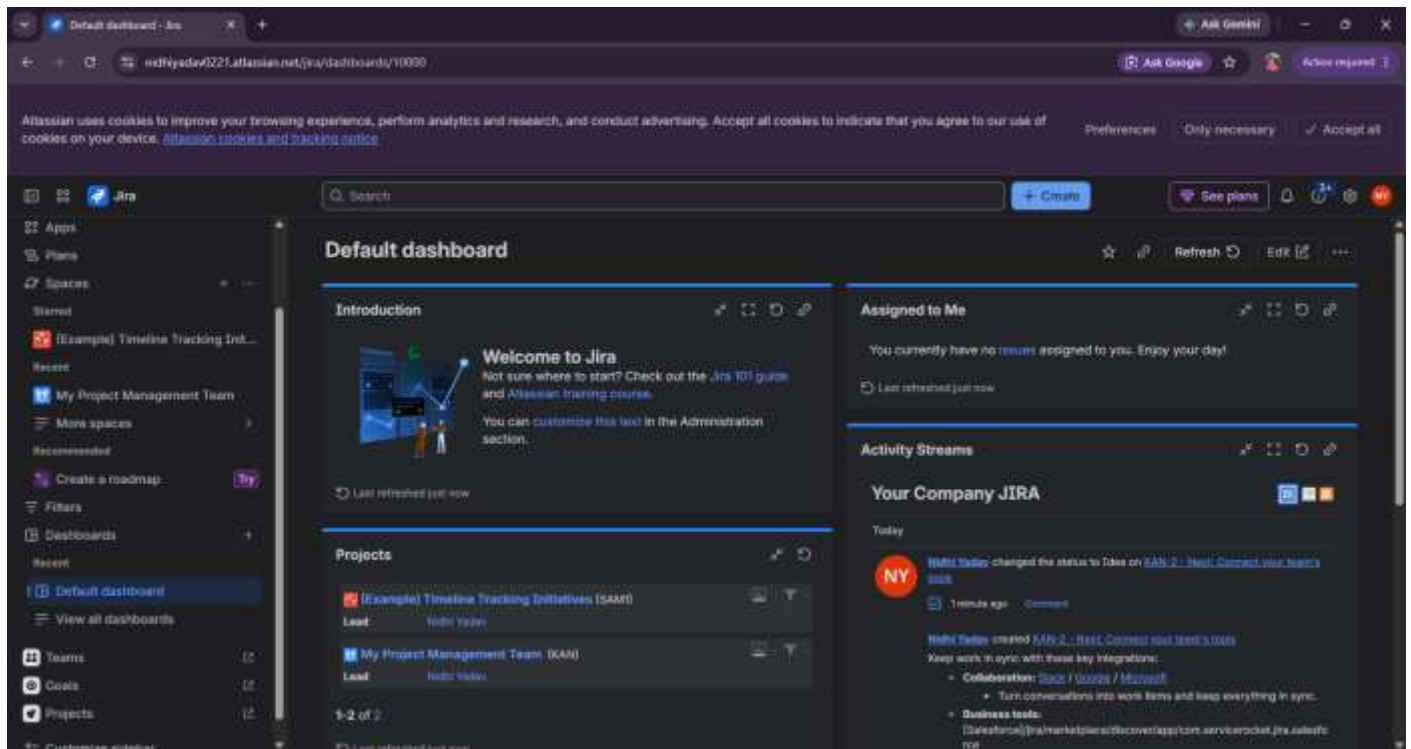

The **Jira Dashboard** will appear. The dashboard provides access to your projects and work.

Practical 1B – Create a Company-Managed Kanban Project

Step 9: Open Spaces

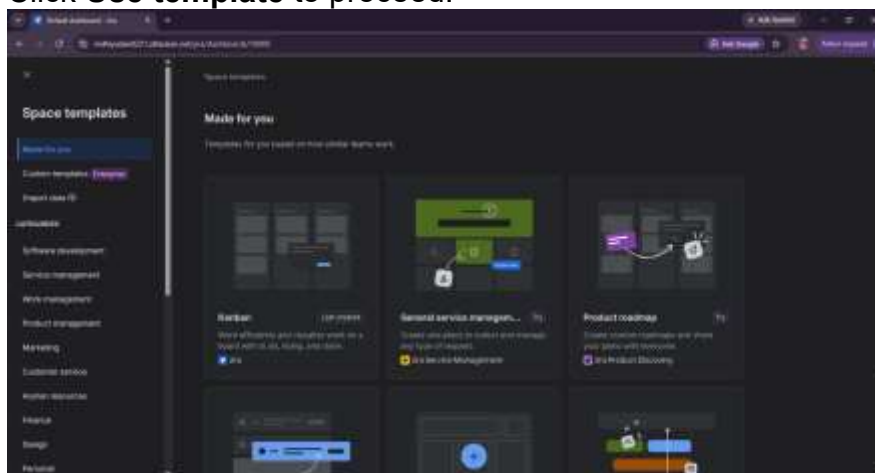

From the Jira navigation menu, click Spaces (+) to create or access a space.

Step 10: Select the Kanban Template

From the available space templates, select **Kanban**.

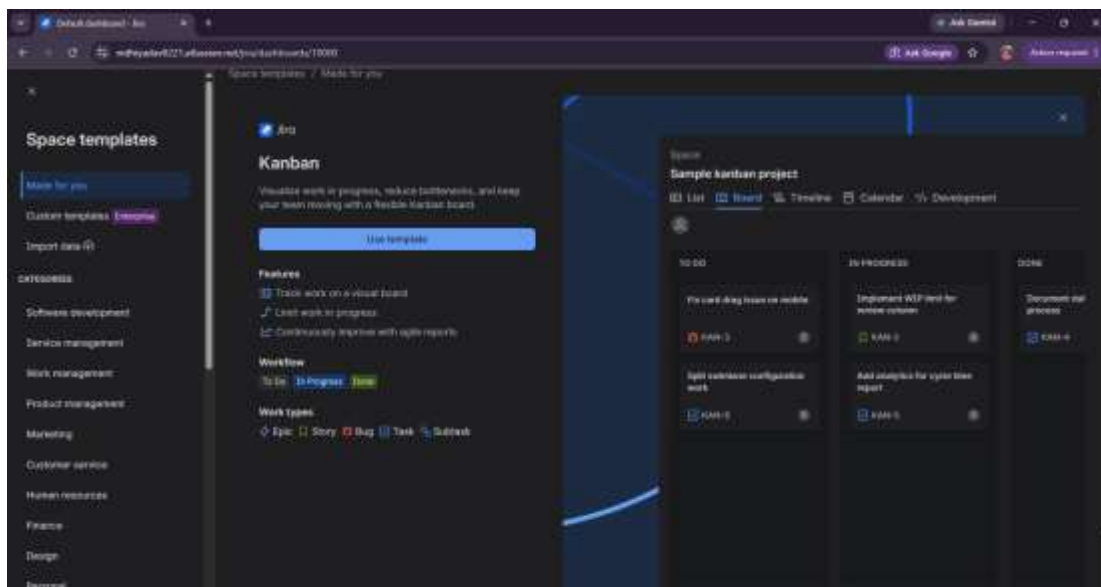

Click **Use template** to proceed.

Step 11: Enter Space Details

Enter the required **Space Name**.

Select **Company-managed** in the space-managed option and click **Next**

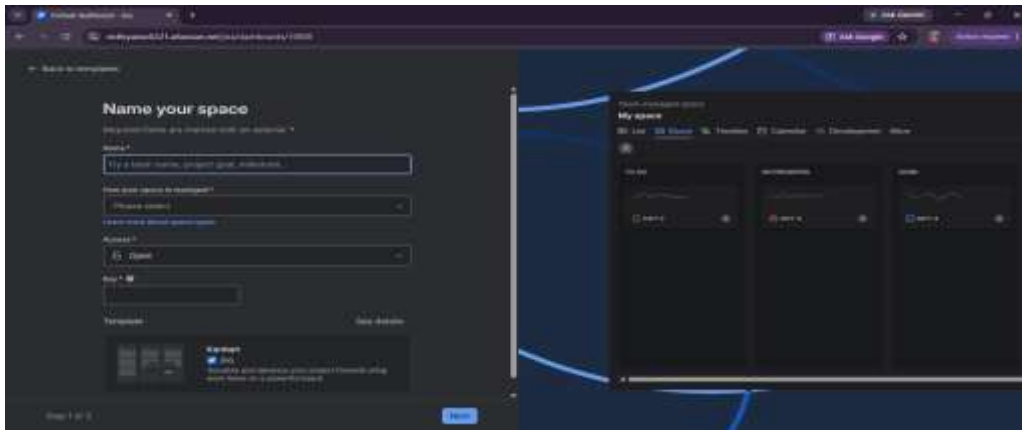

Step 12: Configure the Space

On the **Let's set up your space** screen, configure the required project settings such as:

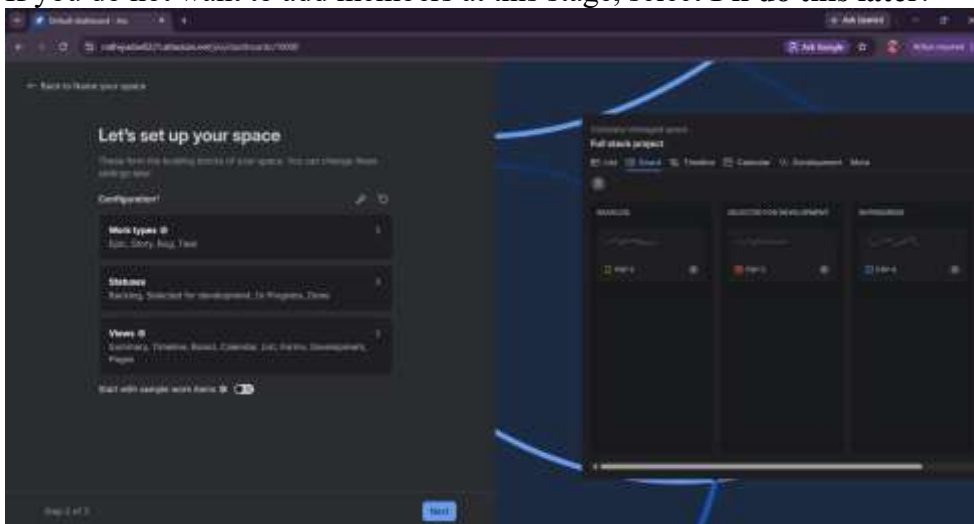

- Work types
- Statuses
- Views

Then click **Next**.

Step 13: Add Team Members

Enter the email addresses of the team members you want to add to the space. If you do not want to add members at this stage, select **I'll do this later**.

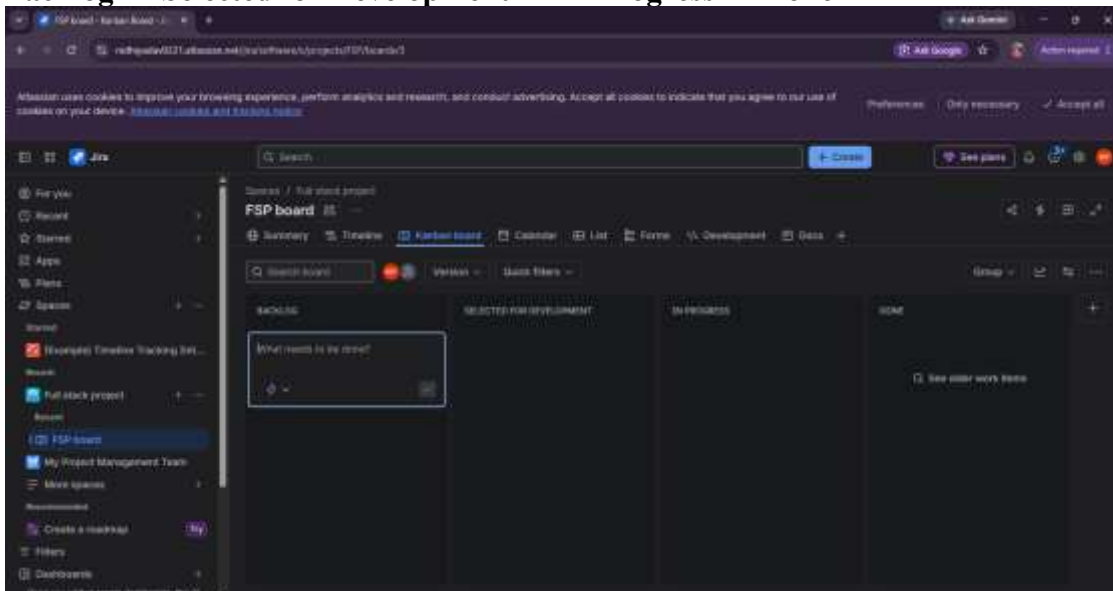

Step 14: View the Kanban Board

After completing the setup, the **Kanban Board** will appear.

The board can be used to create and track tasks through different stages.

The workflow can be represented as:

Backlog → Selected for Development → In Progress → Done

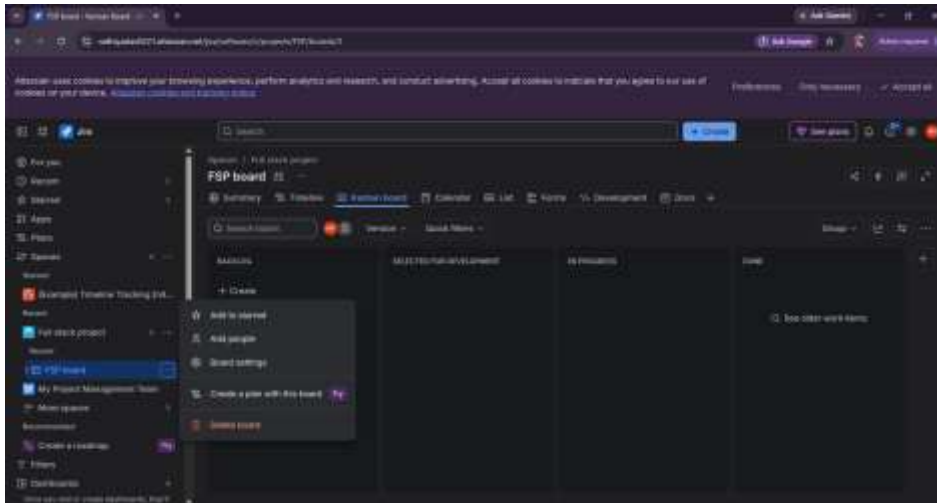

Step 15: Open Board Options

Click the **Board Options** menu on the Kanban board.

The available options include:

- Add to starred
- Add people
- Board settings
- Create a plan with this board
- Delete board

Practical 1C – Configure Project Details

Step 16: Open Space Settings

Open the created Jira project/space from the navigation menu.

Click **Space settings** to access and manage the configuration options of the Jira space.

Step 17: Open Details

In **Space Settings**, select the **Details** section.

The Details section provides basic information about the created space and helps identify and manage the project configuration.
