**Aim :- Practical 8: JQL & Filters**

**A. Write basic JQL queries (Status, Assignee, Priority).**

### Basic JQL Queries

JQL stands for Jira Query Language.

It is used to search and filter issues in Jira.

Status: Used to find issues based on their current status.

Assignee: Used to find issues assigned to a particular person.

Priority: Used to find issues based on their priority level.

JQL can use AND / OR to combine multiple conditions.

It helps in quickly finding required issues in a Jira project.

### B. Create and save filters.

| NY Nidhi Yadav | Medium   | Backlog     |

### Conclusion

JQL helps to easily search and filter Jira issues.

It makes it simple to find issues based on status, assignee, and priority.
