Classification:

- **Project Management Methodology:** Agile
- **Board Type:** Scrum Board
- **Work Management:** Sprint-based
- **Main Activities:** Create Scrum Board, Start Sprint, Complete Sprint and Generate Sprint Report.

Justification:

Scrum Board is used to manage work in **fixed sprints**. It helps the team divide work into tasks, track the progress of each task and check the sprint performance through the Sprint Report. Therefore, Scrum is suitable when work needs to be completed and reviewed within a specific time period.
