Artificial Intelligence
Practical – XI

Roll No :- T053	Name :- Nidhi Yadav
Class :- TYIT	Batch :- 02
Date of Assignment :- 26-09-2026	Date/Time of Submission :- 26-09-2026

Aim:

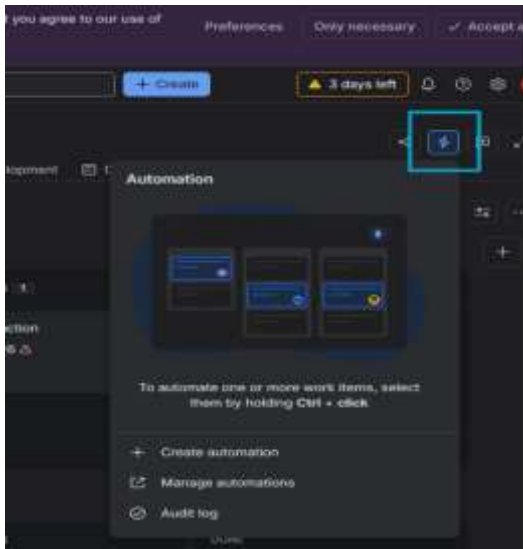

Open the Jira Project.

Go to Automation → Create Automation.

Click Get Started / Next.

Add Trigger → Field Value Changed.

Select Field: Status.

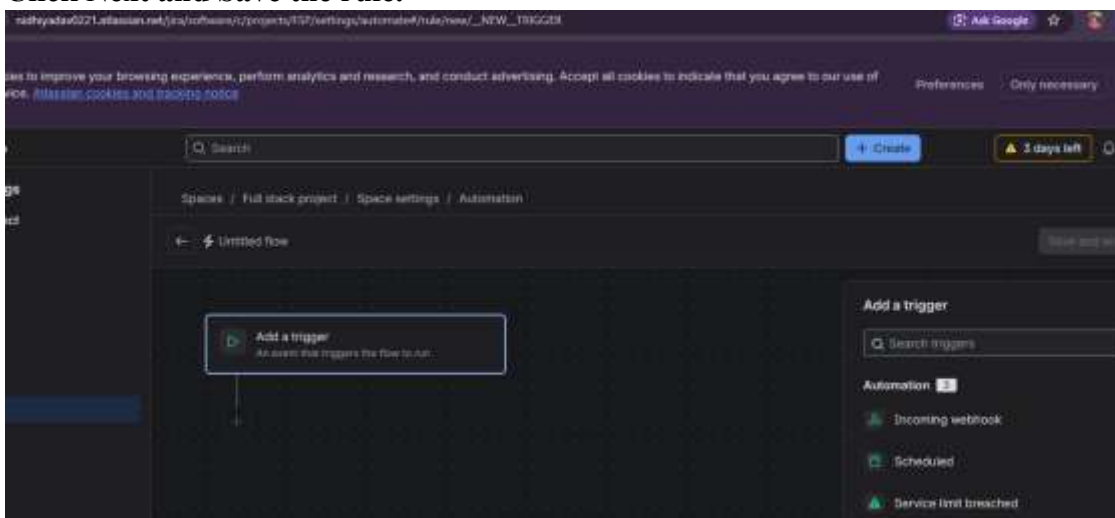

Add Condition → Status = Done.

Add Action → Send Email.

Enter the email details.

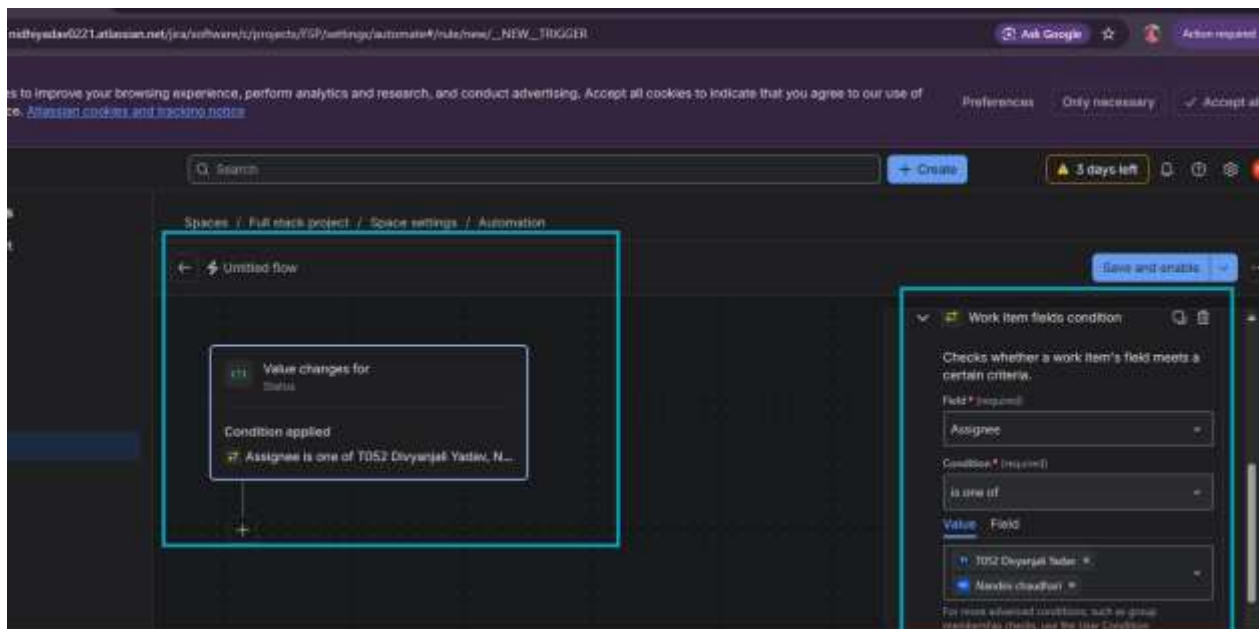

Click Next and Save the rule.

Open the created automation rule.

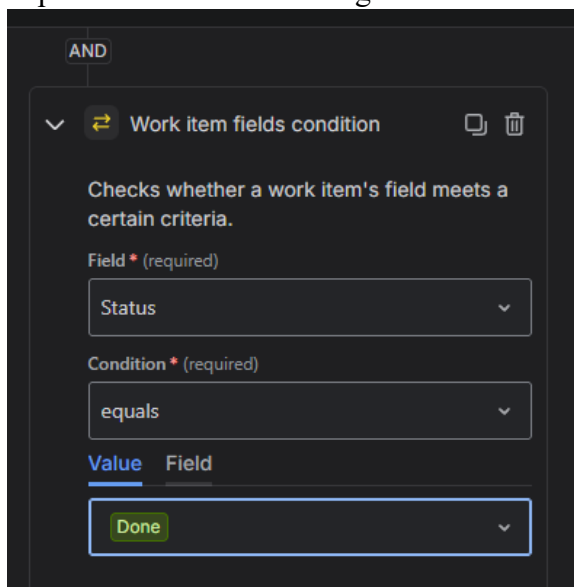

Click Turn on flow.

Enter the Flow Name.

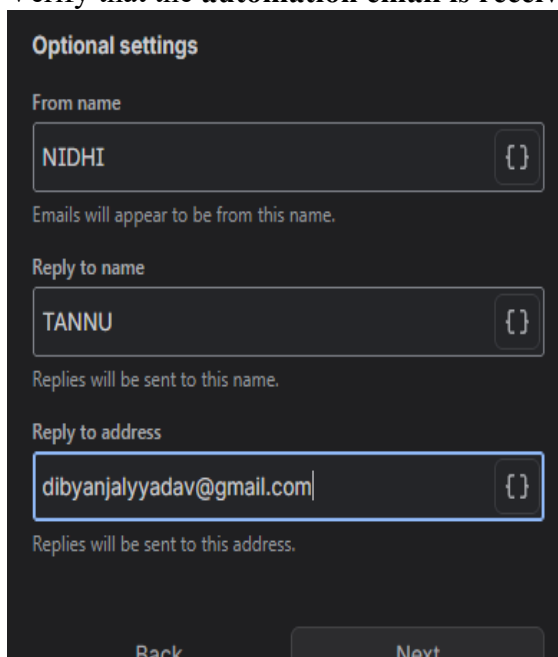

Click **Turn on flow**.

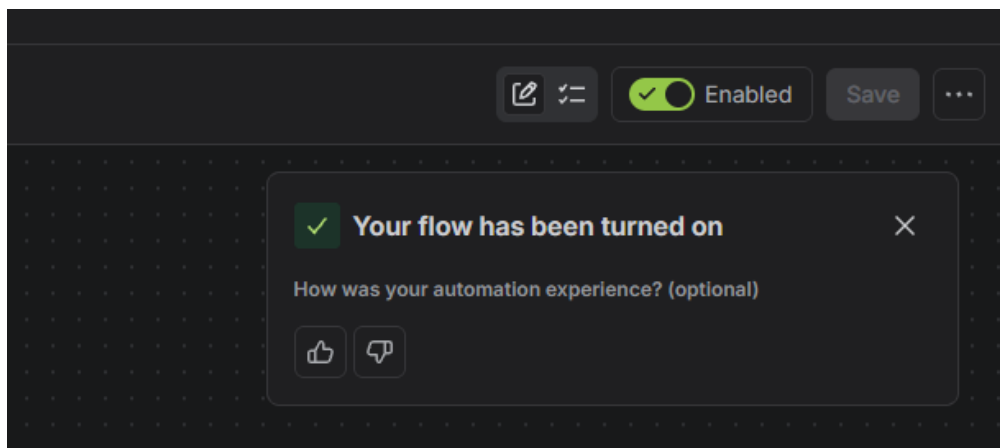

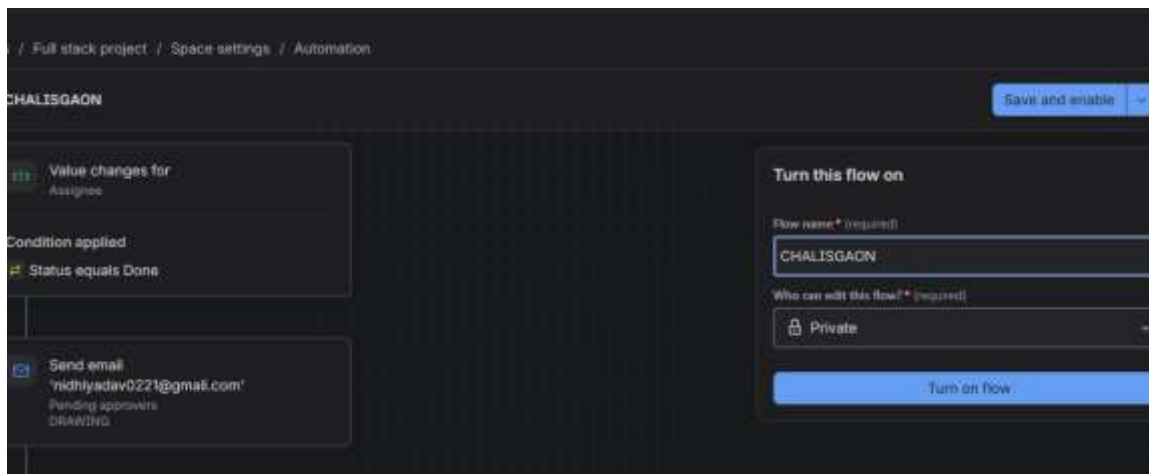

Open a Jira issue and change its status to **Done**.

Check the registered email.

Verify that the **automation email** is received.

Classification

Automation and Workflow Management

Justification

This practical is classified under **Automation and Workflow Management** because it creates an automation rule using a **Trigger** → **Condition** → **Action** workflow, where changing an issue status to **Done** triggers an action such as sending an email.

Classification

Automation Testing and Notification Management

Justification

This practical is classified under **Automation Testing and Notification Management** because the created automation rule is enabled and tested by changing an issue status and verifying that the configured **email notification is sent and received**.
